

Web Forms

Web Forms

What are web forms?

Imagine having access to all the information you need about a tenant or property on your mobile phone or tablet, being able to update and not worry about having an internet connection? Stop imagining and start working remotely with Web Forms.

Who would use Web Forms?

Any staff members who need to access or update information when they aren't at their desk can use Web Forms to view information on tenants, properties or complete surveys using their phone or tablet, even without mobile coverage.

How do staff use Web Forms?

Web Forms is a simple mobile app that runs on a mobile phone or tablet and when the user signs in automatically lists the web forms that person needs to use along with the necessary data. Once loaded the web forms can be used with or without a internet connection giving the user true mobility, regardless of location.

Examples of Web Forms

Asset inspections, tenancy commencement or exit inspections, out-comes meetings, community engagement meetings, incident reporting, hazard inspections, anti social behaviour monitoring.

How is Web Forms priced?

Web Forms is priced per user and we have a library of over 120 forms that can be customised, or new forms can be created to your exact requirements.

Contact us for pricing for your organisation.

The screenshot shows a mobile application interface for a form titled "(Supporting People) Support Plan". The form is displayed on a screen with a status bar at the top showing "10:08 Thu 18 Apr" and "Not Charging". The form has a "Close" button at the top left and "Index" and "Send" buttons at the top right. The form content includes a "Define Objective" section with a green checkmark and a "Send" button. Below this are several sections, each with a "Tap to select" prompt and a dropdown arrow: "Scheme Contact Responsible", "Client Contact Responsible", and "Objective Partner". There are also sections for "Originator" (with the value "omnihelpdesk2"), "Remarks" (with a "Tap to type answer" prompt), "Notes" (with a "Tap to type answer" prompt), "Originator Signature" (with a handwritten signature), and "Client Signature" (with a handwritten signature). A "Summary" section is visible at the bottom of the form.
